PROFESSIONAL SUMMARY

Results-driven Interior Architect and Interior Design Engineer with over 4 years of progressive experience in conceptual design, project management, and BIM modeling. Expertise in space planning, sustainable design, construction documentation, and FF&E specification using advanced software including AutoCAD, 3D MAX (V-ray & Corona), and Revit. Proven ability to lead multidisciplinary teams and manage full-cycle projects while ensuring compliance with Saudi construction standards. Member of SEC.

EXPERIENCE

Gulf Consult | Interior Architect

April 2024 - Present

- Developed integrated architectural, landscape, and user experience designs for industrial, sustainable, and mixed-use projects.
- Produced detailed project studies, IFC drawings, BOQ, and FF&E lists, ensuring strict adherence to industry standards and Saudi codes.
- Executed advanced BIM modeling and 3D visualization to enhance design accuracy and construction documentation.

Battour Consult | Interior Design Engineer

April 2021 - March 2024

- Managed comprehensive interior design projects from concept development through execution, meeting timelines and budget requirements.
- Led the interior design department, streamlining workflows and establishing systematic design processes.
- Developed and illustrated 2D/3D tender and IFC drawings using AutoCAD and 3D MAX, improving project deliverables.
- Coordinated material selection, supplier engagement, and FF&E specification to align with client and regulatory standards.
- Collaborated with architecture and electromechanical teams to integrate design solutions compliant with Saudi construction codes.
- Conducted site visits and quality controls to ensure design implementations met high standards across over 40 diverse projects (residential, retail, corporate, traditional, and industrial).

Elham Company | Interior Designer

October 2020 - March 2021

- Consulted with clients to define architectural preferences and develop tailored design solutions.
- Coordinated 3D renderings and 2D drafting to produce detailed interior and exterior plans and elevations.
- Assisted in furniture selection and material specification, ensuring documentation met project requirements.
- Delivered design concepts for more than 60 projects in residential and retail sectors with a focus on aesthetic and functional excellence.

Norah Mohammad ALSaud Architect & Engineer Office | Interior Designer

June 2018 - August 2018

- Assisted in creating architectural drawings (plans, sections, elevations, and 3D exterior designs) for residential projects.
- Contributed to landscape and furniture design projects, integrating sustainable design practices.
- Prepared detailed reports and documentation post-project completion to support client and stakeholder communications.
- Developed renderings and visualizations to support design presentations and project proposals.

EDUCATION

Bachelor of Science - Interior Design Engineering

Imam Abdulrahman bin Faisal University (IAU)

COURSES & CERTIFICATIONS

- CADMaster – BIM Modeling, Drafting & Coordination.
- McKinsey & Company Forward Program.
- Crossover Management Consulting – PMP Preparation.
- Autodesk 3D MAX V-ray Rendering.
- Autodesk Revit for Architecture & Interior Design.

PROFICIENCIES

- Languages:** Arabic, English.
- Soft Skills:** Effective communication, Problem-solving, Adaptability, Team Collaboration, Stakeholders Management, Negotiation, Critical Thinking, Adaptability.
- Technical Skills:** Strategic Planning | Report Writing | Project Documentation, Microsoft Office Suite | BIM Modeling (Revit) | AutoCAD | 3D MAX (V-ray & Corona) | Lumion | Adobe Photoshop | InDesign.
